

Assembly Global Door Latch ***Standardized Equipment: 27 product variants***

Problem

WTAS approach to problem solving is to define and assess the problem parameters, analyze the requirements, and identify preliminary improvement opportunities.

- Need for incremental and flexible capacity
- Compact system meets floor space
- Low economic threshold justification

Solution

WTAS develops solutions through cross-functional facilitation, knowledge-based application development, and best practices coupled with the right technologies.

- Custom design meet model constraints
- Standardized Automation meets ROIC Goals

Benefits

WTAS works closely with the customer to realize economic benefits based on the evaluation, selection, and implementation of the best alternative solution.

- Met production growth need
- Re-Deployed Engineering Concepts
- Improved return on invested capital

The Customer had this to say:

“Why do I do business with Wes-Tech Automation...

- **Knowledge**
- **Integrity**
- **Quality**
- **Commitment”**

Global Latch
